

COMPANY PROFILE

The company boasts a twenty-year experience in the field of distribution panels and medium / low-voltage electric equipment production. Provided with strong dynamism, the firm is immediately able to satisfy, with precision and responsibility, changing market requests. The specific aim is total customer satisfaction.

The firm has functional premises and boasts a solid structure, characterized by specialized technicians, who regularly attend refresher courses at companies that occupy a position of leadership in electric equipment production. The firm supplies primary and secondary distribution panels and control boards, both for industrial area and single customers, but also for tertiary sector.

Further information and documents about our company and its production are available in our premises

Our offices are easy to reach, because they are placed near main communication routes (Motorway exit of western side of Piacenza, Main Road n. 10 and Via Emilia Pavese). The firm is situated in Piacenza Via G. Leopardi n. 24 (zip code 29100 - ITALY), and it occupies an area of 1,400 square metres.

We enclose a sample of our most significant products.

Thank you for your attention.

Yours faithfully
